Route Map 1 Legend

Route Map 9 shows authorized routes up to 14 feet 0 inches in width for the movement of non-divisible loads (other than mobile or modular units) by annual permit. Refer to Map 2 for pilot vehicle requirements.

- Black routes are authorized routes up to 14 feet 0 inches in width for the movement of non-divisible loads (other than mobile or modular units) by annual permit.
- Red routes are NOT authorized routes up to 14 feet 0 inches in width for the movement of non-divisible loads (other than mobile or modular units) by annual permit. Refer to your permit for widths allowed by annual permit on red routes on this map.

Additional Notes

US20/OR126 In Sisters (Both Directions of Travel)

The movement of two wide loads each exceeding 12 feet in width traveling in opposing directions through the City of Sisters is not allowed through a six block section of the downtown merchant area between South Pine Street and South Larch Street due to horizontal width constraints. The lead pilot vehicle operator is responsible for ensuring that there are no oversize loads over 12 feet in width entering this restricted section from the opposite direction before the permitted vehicle enters the width restricted section.

Pilot vehicles escorting wide loads exceeding 12 feet in width must announce their approaching presence on CB radio channel 17 prior to entering the six block section of the downtown merchant area between South Pine Street and South Larch Street.

In the event of an oncoming oversize load, one of the lead pilot vehicle operators must direct their piloted load to wait and allow the approaching oversize load to pass safely before proceeding.
